Insurance for the digital age

The old way of managing risk doesn't cut it in the modern economy. We designed At-Bay from the ground up to help businesses meet digital risk head-on. At-Bay believes every business, big or small, when empowered to understand and manage risk, can thrive in a digital world.

At-Bay: Insurance for the digital age

Learn about our modern approach to risk management

Experienced underwriting

We offer comprehensive Cyber and Tech E&O insurance policies that are tailored to the specific needs of every business. Our underwriters have been helping brokers navigate complex cyber and specialty insurance products for decades. At-Bay's industry-leading policies go beyond the basics to ensure exceptional coverage when it's needed most.

Assessing cyber risk

We conduct a sophisticated security scan of every business we quote to identify potential weaknesses. Built by our in-house team of experts, our automated, non-invasive scan quickly assesses a business' cyber risk without needing special access and compiles the findings into a security report with clear, actionable recommendations.

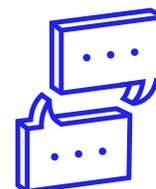

Active risk monitoring

We deploy our active risk monitoring services to continuously scan for cyber threats throughout the life of every policy. Cyber risk is dynamic and constantly evolving, and our security experts are always working to help keep policy-holders secure. If a new vulnerability is detected, we immediately notify the business and provide recommendations on how to resolve the issue.

In-house claims

We handle all claims in-house with an experienced team that has seen it all, from complex ransomware incidents to large-scale privacy incidents, from Fortune 500 companies to emerging startups. At the first sign of an incident, our claims team launches a response plan tailored to the specific needs of a business.

How to get started

- If you're a wholesale broker, get a bindable quote instantly through our broker platform at keeprisk.at-bay.com or send a manual submission to underwriting@at-bay.com
- Access At-Bay's insights and use our data breach calculator at keeprisk.at-bay.com/svc/data_breach_calculator
- Learn more about At-Bay or chat with one of our team members at at-bay.com
