

Silverfort Privileged Access Management

At-Bay policyholders can qualify for a free cyber risk assessment and special pricing.

For a limited time only, new policyholders can get increased discounts (10% or more) on Silverfort Unified Identity Protection platform to help improve identity threat protection across all sensitive corporate and cloud assets. In addition, Silverfort will provide a complimentary risk assessment that will identify the MFA and privileged access protection gaps you must resolve to qualify for a cyber insurance policy.

The platform delivers real-time protection against all attacks that use compromised credentials to access enterprise resources — both on-premises and in the cloud. Extend multi-factor authentication (MFA) and modern identity security to any sensitive resource, including ones that formerly couldn't be protected.

80% of data breaches & ransomware campaigns¹

Use compromised user identities and credentials

Why Use Silverfort's Identity Protection Platform?

Identity is now the top attack surface for cybercriminals. Silverfort empowers organizations to secure their environments from identity threats such as account takeover, lateral movement and ransomware spread. With Silverfort you can:

Extend and enable MFA protection for any device, server, or application to prevent data breaches and meet compliance and cyber insurance requirements.

Discover and protect service accounts by automatically mapping machine-to-machine access, auditing and analyzing machine behavior, and preventing unauthorized use.

Detect and respond to account takeovers, lateral movements, and ransomware propagation, and enforcing real-time responses to stop attacks.

At-Bay recommends that policyholders protect all their corporate and cloud assets from identity-based cyber attacks. Together, At-Bay and Silverfort help customers extend and consolidate their identity security, comprehensively protect against cyber attacks and, in the event of a breach, stop the attack, minimize the damage, and get back to business faster.
