

At-Bay Security Partner Network

Get access to services provided by At-Bay's cybersecurity partners

Every At-Bay Cyber and Tech E&O policyholder gets access to the At-Bay Security Partner Network—a collection of industry-leading technology providers evaluated and selected in critical security areas. And because we've worked with our partners to provide you with preferred pricing, you get protection that's also cost-effective. If you have any questions, reach out to security@at-bay.com for help.

Up to 15% off policy premium

At-Bay partners with Microsoft to help strengthen the cyber security posture of our customers. Microsoft is a global leader in computer software, and Microsoft 365 is used by more than one million businesses worldwide.

Businesses that use Microsoft 365 can save up to 15% on their policy premium by implementing two security controls: Multi-factor authentication for all network and email access, and Microsoft Defender for Office 365 (or another Secure Email Gateway).

10% or more off

Silverfort is a unified identity threat protection platform that helps integrate various identity providers in an organization's environment. Silverfort utilizes agentless and proxyless technology to extend MFA to any resource and access interface across the on-prem and multi-cloud enterprise environment. This includes assets that could never have been protected with MFA before, such as legacy and homegrown applications, command-line access tools, industrial and healthcare systems, file shares, databases, and more.

At-Bay policyholders now receive a complimentary risk assessment and a discount of 10% or more on Silverfort's Unified Identity Protection platform.
