

At-Bay Stance Managed Security

The security partner that comes with your policy

It's not your job to be an expert on cyber security — it's ours. We're here to help you design the security program that best fits your business' needs.

At-Bay Stance™ Managed Security is a team of on-demand experts who proactively keep you safe.¹ This force multiplier helps you build the right posture, provides guidance on security strategy, alerts you to issues, and helps minimize your exposure.

Policyholders with At-Bay Stance are eligible to use At-Bay Stance Managed Security.

CISO-level security guidance

In a cyber landscape that's constantly changing, it can be hard to know where to focus your security efforts for the greatest impact. Our At-Bay Stance Managed Security team can provide tailored analysis and advice to help you prioritize risks, resolve issues, and design better security controls.

In addition to helping you reduce the risk of a cyber attack, our experts can also offer guidance on how to best prepare for a potential breach so you'll get back on your feet faster.

On-demand advice delivered via At-Bay Stance

Fill the gaps in your cyber security and bolster the defenses already in place. Policyholders with At-Bay Stance Managed Security can get expert advice on a breadth of security topics, including:

Vulnerability management

Helping you zero in on the gaps that matter most and supporting rapid remediation.

Endpoint protection

Providing advice to implement and configure top-performing endpoint protection tools.

Email security

Delivering timely insights on the lowest-risk ways to operate essential business tech.

Access controls

Guiding deployment and configuration of MFA and other access control solutions.

Security education & training

Preparing you to recognize and avoid today's cyber threats before they impact your business.

Resilience

Assessing your readiness to resist outages and providing guidance to accelerate recovery.
